

STEAM TOWER™

Game Type: Video Slot Game (OpenBet)

Return to Player: 97.04%

Steam Tower™ takes players on a captivating journey inspired by the 19th century's Victorian era and industrial design. The great adventure begins when the players have to climb up the steam tower to rescue the princess from the dragon. As the player climbs the tower in Free Spins, the Multiplier increases while the player is trying to reach the top floor. Besides saving the princess, the players also receive a top floor bonus coin win and a x7 multiplier.

Steam Tower™ is a 5-reel, 3-row, and 15-bet line steampunk-themed video slot, featuring Stacked Wilds and Free Spins with an increasing Multiplier.

GAME DESIGN

Game Theme and Graphics

Main Game and Wild Symbol

Game Theme and Graphics

Steam Tower™ is a one-of-a-kind video slot that takes players on a captivating journey to the top of the tower. The game has a steampunk-theme and with its 3D graphics and the mixture of Victorian and modern elements in the sound, Steam Tower™ takes video slot games to a higher level.

Main Game

Players can select the coin value and bet level before starting the game round.

Game actions

The buttons on the key pad perform the following different game actions:

	<p>Clicking the left and right arrows increases and decreases the bet level (i.e. number of coins per bet line) by 1. To increase or decrease faster, the player can click and drag the slider.</p>
	<p>Clicking the Spin button starts a game round at the current bet level, the current number of bet lines and the current coin value.</p>
	<p>Clicking MAX BET plays the game at 15 bet lines, the highest bet level, and the current coin value.</p>
	<p>Clicking the left and right arrows increases and decreases the coin value to the next level. To increase or decrease faster, the player can click and drag the slider below.</p>
	<p>Clicking AUTOPLAY automatically plays the game for the selected number of rounds.</p>

- The Tower Meter shows the current multiplier, and your position in the tower.
- The Floor Meter displays which floor you are on.
- When the game reaches the top floor (floor 16), the player is also rewarded with a bonus win of 1000 coins multiplied by the bet level.
- The Multiplier Meter displays the current multiplier.
- One or more Wilds appearing anywhere on the reels on the top floor awards two additional Free Spins.

Wild Symbols

In the main game, one or more Stacked Wilds covering the whole reel activate Free Spins and the game ascends to the first floor. One or more Wilds appearing anywhere on the reels during Free Spins, increase the Free Spins by 2 and the game ascends to the next floor. The player can climb up the tower with every spin until the top floor (floor 16) has been reached.

Free Spins Keypad and Reels

Free Spins and Multiplier

During Free Spins, all bet line wins are multiplied by the Multiplier and are shown in the Multiplier Meter. The Multiplier is updated before each Free Spin and is dependent on which floor the player is on. When the game reaches the top floor (floor 16), the player is rewarded with a bonus win of 1000 coins multiplied by the bet level. One or more Wilds appearing anywhere on the reels on the

top floor, increase the Free Spins by 2. At the end of Free Spins, the game returns to the ground floor in the main game and the Multiplier is reset.

ADDITIONAL INFORMATION

Randomisation

Random Number Generator (RNG)

The algorithm used for random number generation (RNG) is Fortuna, a cryptographically secure pseudorandom number generator (PRNG) devised by Bruce Schneier and Niels Ferguson. For more information, see the document Random Number Generation.

The Random Number Generator and its implementation has been tested and approved/certified for randomness according to prevailing industry standards by an accredited, independent, 3rd party test facility.

Algorithm for a Random Reel Position

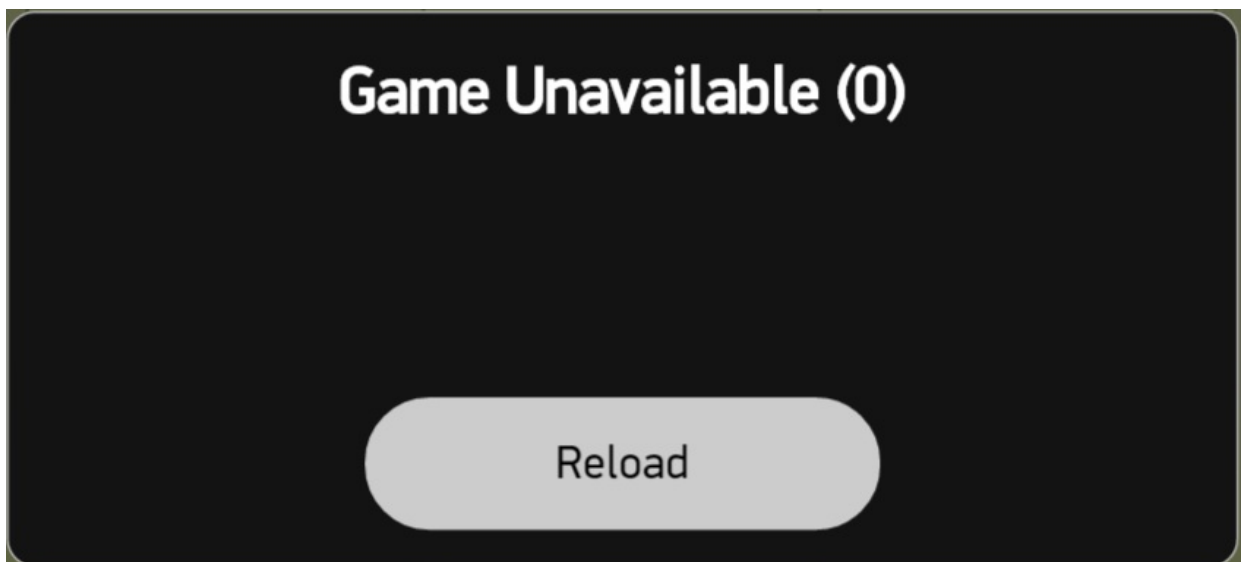

A reel represents an array of symbols where each symbol has an index ("a position").

1. A random number between 0 (zero) and the length of the reel is acquired.
2. The random number is added to the game as "the new reel position to use".

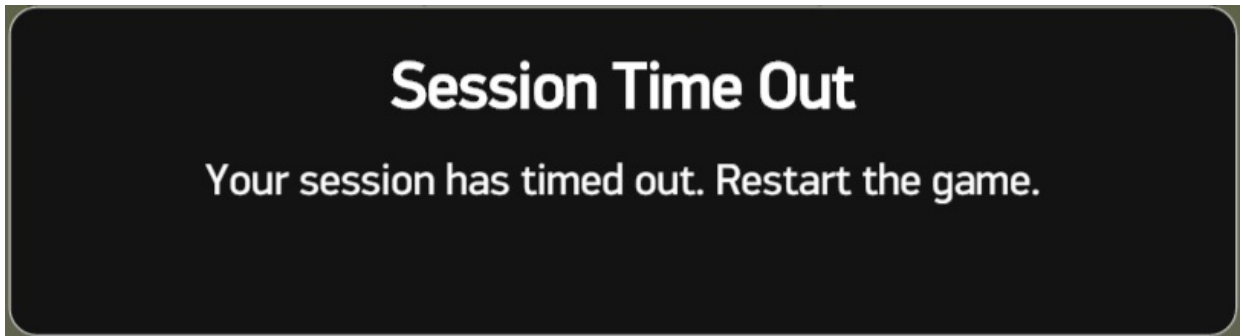

Malfunction Management

If a player attempts to access a game using an invalidated session, (for example, due to inactivity or system restart) an error message is displayed in the game. The player can then log on again and resume game play. The game state is always stored so the player can resume game play exactly where he or she left off.

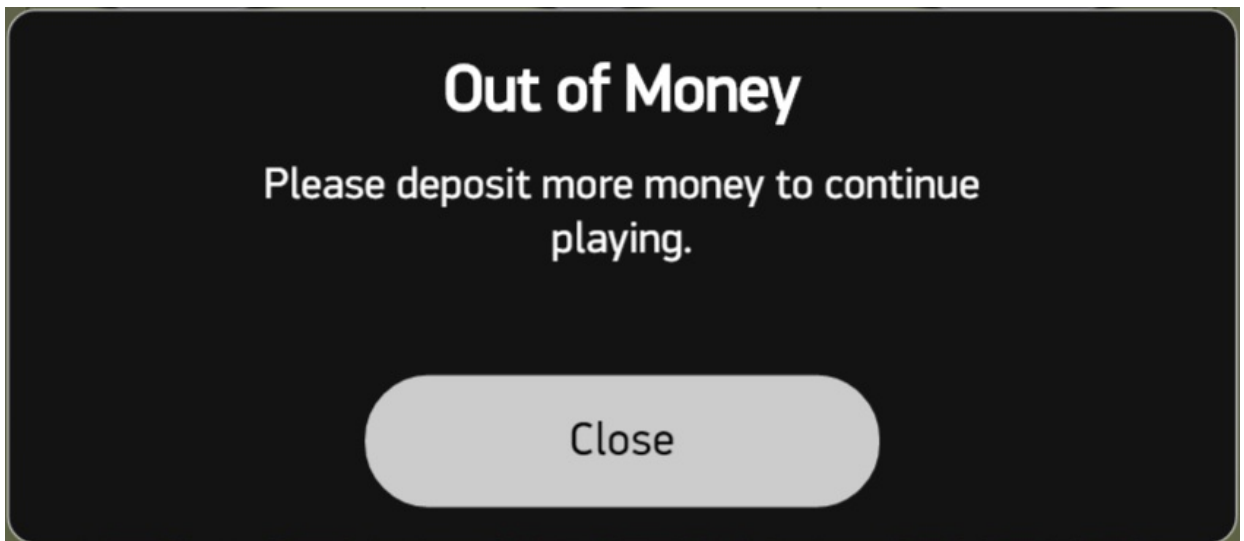

In case of an HTTP error, network timeout or server error a "technical error" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game at a time when the game becomes available.

If a session times out, a "session timeout" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

In case of an "out of money" event, an "out of money" message will be displayed to the player and the game will stay in an "unavailable" state until the player reloads the game.

Information regarding session timeouts and malfunctions is provided to the player via the game rules. Specifically, the player is informed that "In the event of malfunction of the gaming hardware/software, all affected game bets and payouts are rendered void and all affected bets refunded."

Information to the Player

Players receive a response required message every hour of continuous play: They cannot continue playing unless they respond to the message which provides them with details about the amount bet and won so far during game play.

Players also have access to their game session history and game rules from within the game at all times.
